

**P&H in Mossleigh is proud to introduce our New Agronomy Program:**

## **Crop Care**

*Agronomic Solutions*

**Crop Care** is a comprehensive agronomy service now available to our customers out of the Mossleigh office. We are offering 2 different agronomy packages as well as a scout as needed program to provide our customers with agronomy advice and assistance. These programs provide in-depth crop scouting for disease, insects, weeds etc and offer record keeping to customers to help with spray and crop rotations. We look forward to creating individual plans with customers to help them achieve the most out of their acres.

Please contact P&H in Mossleigh for more information or to meet with our professional agronomists to discuss which programs may be a fit to your farms needs. We strive to aid our customers in their farming decisions as much as possible and provide valuable advice and assistance. Please contact our knowledgeable staff with any fertilizer, spray or seed concerns; we look forward to working with you in 2011!
